INDEX

Page

Abortion, infectious, control, experiments 83-90
Aerial dissemination of spores, some aspects with special reference to conidia of *Sclerotinia laxa*. E. E. Wilson and G. A. Baker. 301-327
Agalliana ensigera—
  characteristics, distribution, and host range 34-36
  feeding habits, relation to transmission of Argentine curly top 36-39
  retention of Argentine curly top virus, period, estimation 39-40
  synonyms 19
  transmission of Argentine curly top virus, experiments 27-28
  virus incubation period in, comparison with *Eutettix tenellus* 39
Agelaius phoeniceus phoeniceus. *See* Redwing.
Alcoholic solution treatment on wheat straw, effects on loss of furfural-yielding constituents during. H. D. Weihe and Max Phillips 163-167
ALDRICH, W. W.:
  CRAWFORD, C. L., and MOORE, D. C.: Leaf Elongation and Fruit Growth of the Deglet Noor Date in Relation to Soil-Moisture Deficiency 189-200
  FURR, J. R., CRAWFORD, C. L., and MOORE, D. C.: Checking of Fruits of the Deglet Noor Date in Relation to Water Deficit in the Palm 211-231
Alfalfa—
  silage, analysis 280-284
  wilted and unwilted, chloride content, analyses 284
Allium cepa. *See* Onion.
Anastrepha serpentina—
  developmental period, total length 276
  egg stage, study techniques 265-270
  immature stages, development in relation to temperature. John G. Shaw and Donald F. Starr 256-276
  larval—
    period, length in relation to temperature changes 273-275
    stage, study techniques 270-275
  length of incubation and hatching periods, effects of temperature 266-270
  molting process, effects of temperature 273
  puparial stage, study techniques 275
Apricot—
  blossom infection—
    gradients in vicinity of spore sources 302-303
    incidence gradations, relation to gradations in density of air-borne spores 304-306
  brown rot blossom disease, spread in orchards 302-306
ARCHIBALD, J. G.: Studies in the Chemistry of Grass Silage 277-287

Bactericidal activity, differential, of bovine serum toward *Brucella abortus* strains of high and low virulence. M. R. Irwin and B. A. Beach 83-91
BAKER, G. A., and WILSON, E. E.: Some Aspects of the Aerial Dissemination of Spores, with Special Reference to Conidia of *Sclerotinia laxa* 301-327
BEACH, B. A., and IRWIN, M. R.: Differential Bactericidal Activity of Bovine Serum toward Strains of *Brucella abortus* of High and Low Virulence 83-91
BENNETT, C. W., CARSNER, EUBANKS, COONS, G. H., and BRANDES, E. W.: The Argentine Curly Top of Sugar Beet 19-48
Beta vulgaris. *See* Sugar beet.

Page

Biological research, thermocouples for, construction and installation. Russell Eggert 341-355
Blood—
  calcium level of Hereford cattle, effects of age, feed, and breed 350-362
  levels of calcium and inorganic phosphorus in Hereford cattle. Merle G. Payne, Andrew G. Clark, H. E. Kingman, and William M. Stansbury 357-363
Bovine serum, differential bactericidal activity toward *Brucella abortus* strains of high and low virulence. M. R. Irwin and B. A. Beach 83-91
BOWMAN, DONALD H.: Sporidial Fusion in *Ustilago maydis* 233-243
BRANDES, E. W.:

  LAURITZEN, JOHN I., and MATZ, JULIUS: Influence of Light and Temperature on Sugarcane and Erianthus 1-18
Brassica oleracia var. *capitata*. *See* Cabbage.
BRINK, R. A., PORTER, JOHN W., STRONG, F. M., and NEAL, N. P.: Carotene Content of the Corn Plant 169-187
BROWN, E., and TOOLE, E. H.: Final Results of the Duvel Buried Seed Experiment. 201-210
Brucella abortus strains, of high and low virulence, differential bactericidal activity of bovine serum toward. M. R. Irwin and B. A. Beach 83-91

Cabbage—
  downy mildew—
    development, relation to temperature and humidity 74-77
    environal factors affecting. Matthias W. Felton and J. C. Walker 69-81
    organism, temperature relations 70-73
  inoculation with downy mildew fungus, experiments 70-73
  nutrition, relation to downy mildew development 77-80
Carotene—
  content of corn plant—
    John W. Porter, F. M. Strong, R. A. Brink, and N. P. Neal 169-187
    factors affecting 174-186
  content of green crops, determination method, evaluation 284-286
  distribution in corn plant 173-174
  extraction from corn leaf, methods 171
  yield of corn strains 174-178, 184-185
Carpocapsa pomonella. *See* Codling moth.
CARSNER, EUBANKS, BENNETT, C. W., COONS, G. H., and BRANDES, E. W.: The Argentine Curly Top of Sugar Beet 19-48
Cattle, Hereford—
  calcium and inorganic phosphorus in, blood levels. Merle G. Payne, Andrew G. Clark, H. E. Kingman, and William M. Stansbury 357-363
  fertility, relation to blood levels of calcium and phosphorus 358-362
Chemistry of grass silage, studies. J. G. Archibald 277-287
Chickweed, symptoms of Argentine curly top 31
Chloride content of silage, analyses 283-284
CLARK, ANDREW G., PAYNE, MERLE G., KINGMAN, H. E., and STANSBURY, WILLIAM M.: Blood Levels of Calcium and Inorganic Phosphorus in Hereford Cattle. 357-363

Page

Codling moth larvae—
hibernating—
bound-water content—
E. H. Siegler ... 329-340
determination ... 335-339
susceptibility to low temperatures. E. H. Siegler ... 329-340
overwintering, effects of undercooling and rebound temperatures ... 331-335
undercooling, effects of locality, sex, and weight ... 333-334
Coffee—
leaves, chemical results of varying intensities of sunlight ... 251-255
plant—
appearance, effect of degrees of sunlight ... 247-248
growth, relation to intensity of sunlight ... 248-251
utilization of nitrates under different sunlight intensities. T. Tanada ... 245-258
Cold-hardiness of codling moth larvae, experiments ... 329-340
Colletotrichum circinans, cause of onion smudge ... 259
Color-inhibiting factor in onion, relation to smudge resistance. H. A. Jones, J. C. Walker, T. M. Little, and R. H. Larson ... 259-264
Coons, G. H., Bennett, C. W., Carsner, Eubanks, and Brandes, E. W.: The Argentine Curly Top of Sugar Beet ... 19-48
Corn—
diploid, chemical composition, comparison with tetraploid. G. H. Ellis, L. F. Randolph, and G. Matrone ... 123-130
ears, number opened by redwings in cornfields, relation to amount of grain taken. D. W. Hayne ... 289-295
grain—
amount, taken by redwings in cornfields, relation to number of ears opened. D. W. Hayne ... 289-295
chemical composition, comparison of diploid and tetraploid ... 125
nitrogen content, comparison of diploid and tetraploid ... 125
growth period, length, effect of carotene concentration ... 179-180
leaf—
carotene extraction, methods ... 171
extracts, storage, effect on carotene content ... 171-172
solution, carotene separation and determination ... 172-173
plant—
carotene content—
John W. Porter, F. M. Strong, R. A. Brink, and N. P. Neal ... 169-187
distribution ... 173-174
effect of season ... 180-181
factors affecting ... 174-186
genetic make-up, effect on carotene content ... 174-175, 184-185, 186,
maturity, effect on carotene content ... 175-181, 185-186
number per hill, effect on carotene content ... 184
pollination, prevention, effect on carotene content ... 182
sugary character, effect on carotene content ... 182
sun-red character, effect on carotene content ... 182-184
smut. See *Ustilago maydis*.
stover—
chemical composition, comparison of diploid and tetraploid ... 127
nitrogen content, comparison of diploid and tetraploid ... 126
strains, carotene yield ... 174-178, 184-185
tetraploid, chemical composition, comparison with diploid. G. H. Ellis, L. F. Randolph, and G. Matrone ... 123-130
See also Maize; *Zea mays*.
Cornfields, grain taken by redwings, relation to number of ears opened. D. W. Hayne ... 289-295

Page

Cotton—
growth in sterile cultures ... 140-141
phymatotrichum root rot in, influences of carbohydrate levels and root-surface microfloras. Frank M. Eaton and Neil E. Rigler ... 137-161
plant inoculated with *Phymatotrichum omnivorum*, chemical analyses ... 140
plants—
inoculations with *Phymatotrichum omnivorum*, methods ... 139-140
phymatotrichum root rot, influence of carbohydrate levels and root-surface microfloras. Frank M. Eaton and Neil E. Rigler ... 137-161
root-surface microfloras—
effects of carbohydrate levels ... 153-154
relation to root rot resistance ... 154-157, 158
roots, carbohydrate levels—
effects on root-surface microflora ... 153-154
relation to root rot susceptibility ... 142-153, 157, 158
Cows, vaccination for infectious abortion, serum tests ... 84-90
Crawford, C. L., Aldrich, W. W.: and Moore, D. C.: Leaf Elongation and Fruit-Growth of the Deglet Noor Date in Relation to Soil-Moisture Deficiency ... 189-200
Furr, J. R., and Moore, D. C.: Checking of Fruits of the Deglet Noor Date in Relation to Water Deficit in the Palm ... 211-231
Curly top, Argentine, of sugar beets. *See* Sugar beet curly top, Argentine.

Dandelion, Russian—
leaves, latex tubes. Edward F. Woodcock ... 297-300
roots, latex-tube area. Edward F. Woodcock ... 297-300
Date, Deglet Noor—
air surrounding, vapor-pressure deficit, effect ... 223-225
checking reduction, relation to water deficits ... 226-229
fruit—
checking, relation to water deficit in the palm. W. W. Aldrich, J. R. Furr, C. L. Crawford, and D. C. Moore ... 211-231
detached, water—
intake, effect ... 219-222
supply, variation, effect ... 222-223
development, effect of water deficit ... 193-196, 198-199
growth, relation to soil-moisture deficiency. W. W. Aldrich, C. L. Crawford, and D. C. Moore ... 189-200
on palm, transpiration rate ... 225-226
quality, effect of water deficit ... 197, 199
susceptibility to checking ... 213-230
leaf elongation and fruit growth, relation to soil-moisture deficiency. W. W. Aldrich, C. L. Crawford, and D. C. Moore ... 189-200
palm—
inflorescences, development, effect of water deficit ... 197
leaf elongation—
and fruit growth, relation to soil-moisture deficiency in Deglet Noor. W. W. Aldrich, C. L. Crawford, and D. C. Moore ... 189-200
rate, relation to soil moisture, experiments ... 190-193, 198
water deficit—
effects ... 193-197
relation to fruit checking. W. W. Aldrich, J. R. Furr, C. L. Crawford, and D. C. Moore ... 211-231
Downy mildew. *See* Mildew, downy; also under Cabbage.
